

To Whom It May Concern: I am the owner of a car that has XM Satelite Radio. I purchased the car on March 2, 2004 and immediately became a devotee of XM. I used to listen to AM talk and news radio. Since March 2 I listen almost exclusively to XM. One of my favorite features is XM's market targeted Instant Traffic And Weather. I do a lot of driving into and out of the City of Philadelphia and I need constant and reliable traffic and weather information. THERE IS NOTHING ON THE DIAL IN THIS AREA THAT COMPARES WITH XM FOR ACCURACY AND TIMELINESS. I would be very disappointed if I were to lose acess to XM Traffic and Weather. Please do not bow to the pressure being brought to bear by the large radio station owners. All they do is stifle competition and ruin the product. XM is a wonderful, refreshing, entertaining alternative. If you take away XM Traffic & Weather I will be very disappointed and will use my perogative at the ballot box to voice my discontent.
